Economist & Data Scientist (Business Intelligence) · Development, Resource & Water Economics

Economist and data scientist with eight years of applied research in state government and the medical life-sciences industry, grounded in fieldwork across the Andes, Central America, and the American West. I pair formal training in economics with hands-on data engineering and statistical analysis (Stata, R, Python, SQL) to turn messy, real-world data into rigorous evidence that policymakers, business leaders, and communities can act on. Driven by lifelong curiosity and a passion for learning, I am seeking doctoral research on how climate, land-use, and resource policies shape water access and rural livelihoods.

Research interests: development and resource economics; policy impact evaluation; water access, governance, and allocation; agrarian change and value capture in export agriculture and extractive industries (coffee, cocoa, copper); economic and business impacts of changing watershed dynamics on downstream water users.

RESEARCH & PROFESSIONAL EXPERIENCE

ELITechGroup (now Bruker Medical) — 2019 – 2024

Research Analyst & Data Scientist · Business Development / BI Analyst — *Logan, Utah, USA*

- Monitored and analyzed the global medical-device marketplace across 100+ countries in every world region, tracking competitor offerings and market developments to define market capture and shape international product and market-entry strategy.
- Compiled and analyzed the worldwide installed-base dataset for the product portfolio, assessing performance, adoption, and market prevalence by region.
- Implemented the company's weekly, quarterly, and annual global reporting system (SQL, Power BI, Excel), tracking KPIs for customer satisfaction, product performance, sales, and service to inform executive decision-making.
- Structured global customer research and product feedback, translating user needs into requirements with R&D engineers from concept to launch.
- Co-designed and analyzed a validation study of automated white-blood-cell classification (124 slides, eight staining variables, pre-specified ≥95% agreement threshold); co-authored the resulting white paper [2].

Utah Department of Workforce Services, Workforce Research & Analysis Division — 2017 – 2018

Regional Labor Economist, Northern Utah — *Salt Lake City, Utah, USA*

- Analyzed labor-market dynamics and growth projections for five counties (Cache, Rich, Box Elder, Davis, Weber) using Bureau of Labor Statistics, U.S. Census Bureau, and state administrative data.
- Produced the region's monthly, quarterly, and annual labor-market reports and built and maintained public *County Economic Snapshot* dashboards in Tableau, informing state and local planning and policy.
- Presented findings to community leaders, employers, and public stakeholders, and answered data requests on labor retention and re-entry among specific demographic groups and on in-demand occupations and their educational requirements.

Lewis & Clark Trail Adventures — 2026

River & Trail Expedition Guide · Field Assessment Co-Author — *Missoula, Montana, USA*

- Member of a five-person team that carried out a four-day condition assessment of the historic Lolo Trail (Trail #25) for the Lewis & Clark Trail Alliance. Logged ~115 GPS waypoints, built the segment inventory, rated 22 segments on a five-point scale, and wrote and compiled the 34-page report with a funding-ready 2027 project list [1].
- Cross-checked ratings against an independent parallel survey and recommended a shared condition scale for comparable year-on-year monitoring. Identified partnerships needed with the U.S. Forest Service, the Nez Perce Tribe, and landowners under checkerboard land ownership.
- Guided, cooked for, and hosted multi-day river and trail expeditions in remote terrain (Upper Missouri River, Main Salmon River, and the historic Lolo Trail). Ran field operations and logistics and interpreted Indigenous, Corps of Discovery, and Western-expansion history for guests.

Big Brothers Big Sisters of Utah — 2015 – 2017

Program Coordinator — *Park City, Utah, USA*

- Supervised and coordinated a bilingual (Spanish/English) youth mentoring program: case management, volunteer training, child advocacy, and weekly, monthly, and annual program events.
- Kept case records on mentor–child relationships to track outcomes; mediated between children, families, and mentors in both languages.

EDUCATION

MSc Technology Innovation

Emphasis in Database Architecture & Software Engineering

University of Advancing Technology (online)

Tempe, Arizona, USA · 2023 – 2026

Coursework: innovative and adaptive technology leadership, database architecture & management, software engineering, full-stack development, AI & machine learning, leadership theory, cybersecurity

MSc International Affairs & Global Enterprise (MIAGE)

University of Utah

Salt Lake City, Utah, USA · 2012 – 2015

Emphasis: international economics, international socioeconomic & community development, international business

Coursework: international political economy & development, multinational firms, international management, international organizations & NGOs, international law, research design & policy analysis, international sociology & anthropology

Capstone: *The World's Struggle for Clean Water* (2013) [4]

Field programs: Peru (2013), Costa Rica (2014)

BS Economics · BA Political Science · BA International Studies

University of Utah

Salt Lake City, Utah, USA · 2007 – 2011

Minor in Latin American Studies; **Certificate** in International Relations

Honors: Phi Beta Kappa; Hinckley Institute of Politics Scholar; Lowell Bennion Center Student Volunteer Coordinator (Veterans Affairs Nursing Home)

Internships & field study: Ecuador (2010), Washington, D.C. (2009), Argentina (2009), Chile (2008)

INTERNATIONAL FIELD EXPERIENCE

Costa Rica: University of Utah field program **2014**
Community leadership development, participatory planning, and sustainable-tourism strategy with rural coffee-growing and cloud-forest communities.

Peru: University of Utah field program **2013**
Clean-water access in impoverished Andean agrarian communities: delivering safe drinking water, plus the education, resources, and small-enterprise models that sustain it. Informed my MIAGE capstone on global water access [4].

Ecuador: ASCEND: A Humanitarian Alliance / University of Utah **2010**
A three-month stateside internship followed by six months living in the rural Chimborazo region of Ecuador, partnering daily with impoverished Andean communities on leadership development, school and infrastructure building, English and life-skills/wellness classes, and small-business development. Also coordinated and ran a 5K benefit race.

Argentina, Ecuador & Southeast Asia **Extended residence**
Lived and worked for extended periods in Argentina and Ecuador, including travel through Patagonia, the northern Andean deserts, and the high Andes; earlier years living and traveling in Southeast Asia as a youth (Bangkok, Thailand).

TEACHING, PUBLIC ENGAGEMENT & LEADERSHIP

- **Public interpretation (2026):** led history-focused, multi-day expeditions for guest groups, covering the Nez Perce and other Native nations, the Corps of Discovery, the fur trade, and the steamboat era.
- **Research communication (2017–2024):** presented regional labor-market findings to community leaders, employers, and public stakeholders across Northern Utah, and business-intelligence findings to senior executives and stakeholders at ELITechGroup.
- **Mentoring & training (2015–2017):** trained, guided, and supported volunteer mentors in a bilingual youth mentoring program.

ADDITIONAL EXPERIENCE

Cook & Kitchen Manager, commercial kitchens, Salt Lake City & Park City, Utah: 12+ years of operations, cost control, food safety, and staff development **2007 – 2025**

Banking Associate, Wells Fargo Bank, Millcreek, Utah: high-volume transactions under federal compliance and audit standards **2017**

Ski Industry: rentals and ski shop, Beaver Mountain, Utah (2025–26); lift operations, Snowbird, Utah (2010–11) **2010 – 2026**

INTERESTS

Snowboarding/skiing and backcountry snow; whitewater rivers; mountain travel in the Andes; cooking; Western and Indigenous history

METHODS & SKILLS

Quantitative methods
Applied econometrics and regression analysis; experimental and validation design; descriptive and inferential statistics; labor-market and regional analysis

Statistical software
Stata, R, Python, advanced Excel

Data engineering
SQL (extensive), SQL Server, ETL pipelines, relational database design, data warehousing, ERP systems

Visualization & BI
Tableau, Power BI, Microsoft Dynamics

Data sources
BLS, U.S. Census Bureau, state administrative and labor-market data, private corporate business data

Programming
Python/Flask, C#, C++, JavaScript, HTML/CSS, React Native; cloud (Azure, AWS, Google Cloud)

Field & qualitative
Field condition surveys; GPS field data collection (onX); bilingual fieldwork, interviews, and community engagement in Spanish; stakeholder presentations; logistics in remote rural settings

SELECTED PROJECTS

County Economic Snapshots
Public Tableau labor-market dashboards, Utah DWS

Mr. West's Skier's Guide
Mobile app (React Native), Google Play & Apple App Store, 2026

Canoes and Confluences
Website designed, built, and launched for a Pacific Northwest history educator, 2026

Relational database web app
Schema design, SQL, and Flask front end (UAT)
